

CERTIFICATE OF QUARANTINE COMPLIANCE

For: Michigan's Blueberry Scorch, Shock and Sheep Pen Hill
Virus Exterior Quarantine

The blueberry nursery stock (Vaccinium corymbosum) in this consignment has been grown under a compliance agreement monitored by the Ohio Department of Agriculture to meet the criteria of the Michigan Blueberry Scorch, Shock and Sheep Pen Virus Quarantine by the following method(s):

CHECK THE APPROPRIATE BOX (es):

- The Vaccinium plants originate from a Blueberry Scorch, Blueberry Shock and Sheep Pen Hill Disease Viruses Pest Free Area.
- The Vaccinium plants were certified under an official certification program in the state of origin that includes testing and inspection for blueberry viruses
- The Vaccinium plants were shown free of Blueberry Scorch Virus, Blueberry Shock Virus and Sheep Pen Hill Disease Virus based on an official laboratory test.
- The Vaccinium plants were micropropagated and/or grown in an insect-proof greenhouse or screenhouse and originate from mother plants that have been tested and found free of Blueberry Scorch Virus, Blueberry Shock Virus and Sheep Pen Hill Disease Virus.
